4-ch V-Lok Battery Charger
Instructions

Mains Input

Suitable for worldwide use (100~240 VAC 50~60Hz). This product is class 1 and must be earthed. These chargers are CE marked and have been designed to comply with all relevant safety/EMC regulations.

Do not cover Vents!

Battery Charging

The VL-4X4 is a four-channel simultaneous fast charger which has been specifically designed to charge Hawk-Woods V-Lok batteries. All four channels work independently of each other; enabling to charge up to four batteries at one given time it takes to charge one.

Charger Use

A **RED** illuminated light will indicate that the charge is connected to the mains and ready to power a battery, which when connected will illuminate a **YELLOW** LED; if the battery is below 80% charge.

At **80%** charge and above the **YELLOW** status LED will flash **YELLOW** & **GREEN**.

At **100%** charge the LED will keep a consistent **GREEN** light to indicate that the battery is ready for use.

Charging Status Indication Sequence

Specifications

Mains Input: 100~240 VAC 50~60Hz

Charging Current: 16.8V @ 4A (Max)

Suitable Batteries to use with this Charger

VL-90H - 90Wh Li-Ion Battery

VL-175H - 175Wh Li-Ion Battery

VL-100 - 100Wh Li-Ion Battery

VL-190 - 190Wh Li-Ion Battery

VL-140 - 140Wh Li-Ion Battery

VL-98M - 98Wh Li-Ion Mini Battery

VL-150H - 150Wh Li-Ion Battery

VL-150M - 150Wh Li-Ion Mini Battery

VL-175 - 175Wh Li-Ion Battery

WARNING: Only use Hawk-Woods V-Lok Lithium-Ion type batteries with this charger.
